General Remarks

The IR widget is a small search box that can be easily incorporated into any website (partner website, subscribing library, etc.). Via the search box users can search the database without having to log in to the system. It will bring our bibliographies closer to the end-user. The widget aims to attract new users and increase usage.

Embedding RHE widget in a web page.

The following code snippet must be added in the web page for the IR widget to be embedded:

```
<script type="text/javascript"
src="http://apps.brepolis.net/BrepolsWidgets/BrepolsWidget.ashx?wi=IR&width=180&height=89"
></script>
```

Functionality

This widget serves as a link to the RHE search engine.

Upon entering a keyword or keywords and clicking the search button, the user is redirected to a new window where the results of the query appear in the IR web page. Only users with an active subscription will be able to view the results.

The screenshot shows the IR web page search results for the keyword 'jesus'. The page header includes the BREPOLIS logo, language options (EN, FR, DE, ES, IT), and navigation links (Home, Help, Logout). The main header features the IR logo and the text 'INTERNATIONAL BIBLIOGRAPHY OF THEOLOGY, CHURCH HISTORY AND RELIGIOUS STUDIES'. Below the header is a navigation menu with options like 'Introduction', 'Search', 'Coverage', 'Search History', and 'My Email Alerts'. The search results section shows 14213 hits for the keyword 'jesus'. The results are displayed in a table with columns for '#', 'Author', 'Title', and 'Year'. Each row includes a checkbox, a small icon, the author's name, the title, the year, and a 'new' status with a 'LibriLinks' icon.

Adjusting Size

The code snippet above contains in its query string value 180 pixels for width and 89 pixels for height. This is the minimum size for the widget.

If desired, width can be increased to a maximum of 570 pixels.

```
<script type="text/javascript"  
src="http://apps.brepolis.net/BrepolsWidgets/BrepolsWidget.ashx?wi=IR&width=570&height=89"  
></script>
```

Adjusting the widget's height has no effect on the actual size of the widget, but it increases the top and bottom margins. It is not recommended to do so unless strictly necessary. 89 pixels are again the optimal height.
