Monumenta Germaniae Historica

The *Monumenta Germaniae Historica* was founded in 1819 by the *Gesellschaft für Deutschlands ältere Geschichtskunde*. It is without doubt one of the most prestigious editorial undertakings for the critical publication of medieval historical texts.

In more than 300 volumes, covering the widest possible range of historical documents, divided into five major Series (*Scriptores*, *Leges*, *Diplomata*, *Epistolae* and *Antiquitates*) and into 33 Subseries, the *Monumenta* not only continues its editorial programme but it has established for all Western scholarship a standard for critical editions.

The powerful search engine developed by the Centre 'Traditio Litterarum Occidentalium' and Brepols Publishers allows unparalleled exploitation of this important body of texts, permitting in-depth searches of the corpus. Moreover, the integration of the *eMGH* into the Brepols Latin platform offers the opportunity to carry out searches simultaneously with other collections of texts bringing together a total of more than 5,500 works (*Library of Latin Texts - Series A*, *Library of Latin Texts - Series B*, *Aristoteles Latinus Database*, *Archive of Celtic-Latin Literature*), and allows the user to search Latin reference dictionaries (*Database of Latin Dictionaries*).

To this date the following series and sub-series have been incorporated

Scriptores

- › Auctores antiquissimi: 1-8, 10, 12-15

Key features

- At the moment, the *eMGH* contains more than **1,450 texts**.
- The database is **updated yearly** with new material. As a general rule, precedence is given to narrative sources.
- The interface is the same as for Brepols other full-text databases (*Library of Latin Texts - Series A*, *Library of Latin Texts - Series B*, *Archive of Celtic-Latin Literature* and *Aristoteles Latinus Database*)
- The powerful search-software enables the users to undertake **enhanced search possibilities**:
 - by using wildcards and operators, the user can construct complex search-queries
 - filters are used when, instead of searching through the entire data set, one wishes to restrict the search to a particular Author or group of Authors, a particular Work, a particular Period or Century.
- Interface in English, French, German and Italian
- The *eMGH* are part of the **Brepols Latin platform** which is augmented every year and which currently includes five corpora of texts totalling 5,500 texts in all.

By means of the **Cross Database Searchtool**, the *eMGH* can be searched simultaneously with the *Library of Latin Texts – Series A*, the *Library of Latin Texts – Series B*, the *Aristoteles Latinus Database*, and the *Archive of Celtic-Latin Literature*

- ▶ **‘live links’ to reference dictionaries** (*Database of Latin Dictionaries*): a user can select a word found in a text of *eMGH* and automatically find entries on the word in the constituent dictionaries of the *Database of Latin Dictionaries* (**10 dictionaries available**)
- ▶ Advanced search capacities for the *eMGH* are combined with the possibility of accessing the digital version of each text. Thus, from each search result, a link to the digital version of the corresponding page (along with its critical apparatus) is offered
